WEATHER OF CONCERN

Weather of Concern

- Monsoon moisture will produce thunderstorms over portions of mountainous areas eastern San Bernardino, Santa Rosa and Laguna today.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

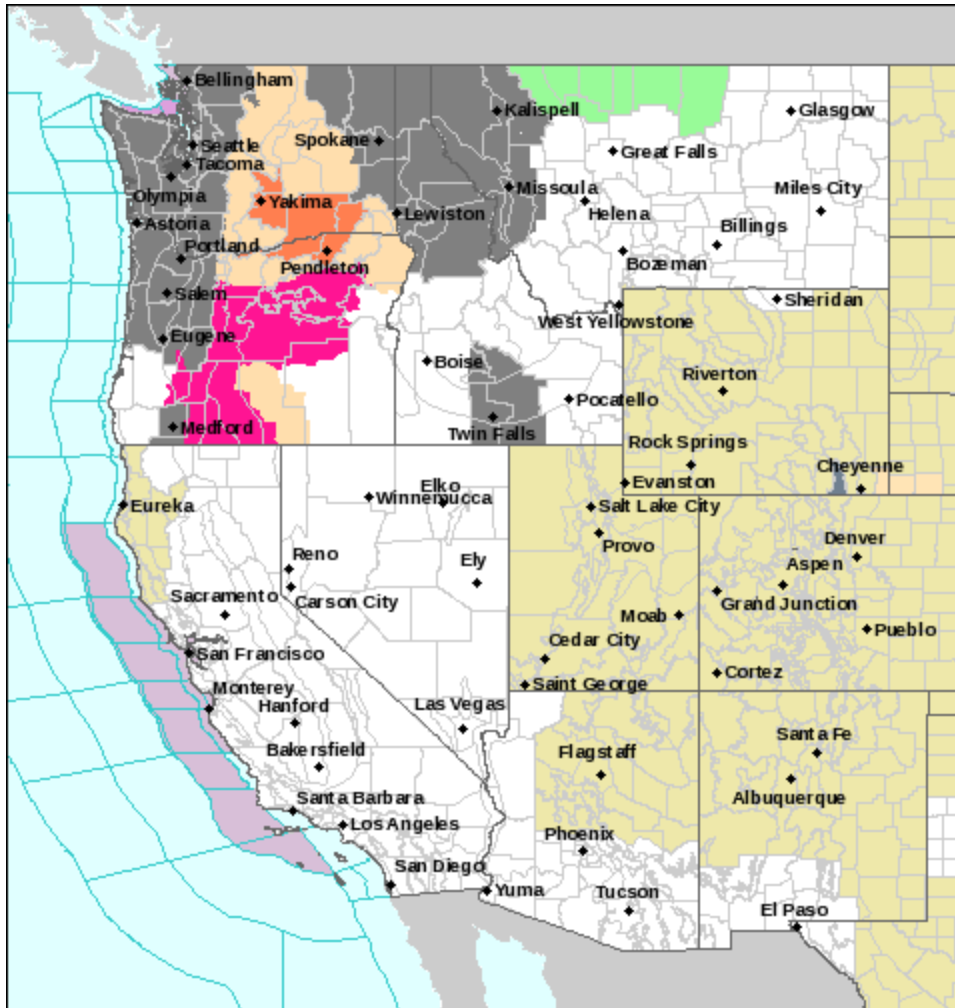

NORTHERN CALIFORNIA

A low pressure trough will move into place along the coast today through the weekend. A small chance of late afternoon and evening thunderstorms will linger today in particular over the far NW mountains, otherwise dry conditions will be in place across the region well into next week. Afternoon winds will become more reliably S to W and somewhat stronger over this weekend. Near and east of the Cascade-Sierra crest the strongest gusts will mostly be around 25 mph, and low afternoon RH (12-18%) is also expected there. The increase in wind and drier conditions will encourage any lurking holdover fires to become active. Temperatures will be quite seasonably warm into the weekend, but drop to a little below normal early next week when the core of the trough goes through. The marine layer will remain quite deep along the coast for at least a few more days with rather persistent low clouds leaving some areas without afternoon clearing.

SOUTHERN CALIFORNIA

Southwesterly flow aloft coupled with onshore flow at the surface will continue across the area the next few days which will keep most of the district mostly sunny with near normal temperatures. Some monsoonal moisture may reach the far southern part of the state today and tomorrow, leading to isolated thunderstorms from San Diego County eastward into the deserts. The rest of the area will not see any thunderstorms through the middle of next week. Temperatures today will be about the same as the past few days with highs in the 70s along the coast, mid and upper 90s in the valleys and foothills to 110 in the low desert. Minimum relative humidity (RH) will continue to trend lower above and inland from the marine layer with readings reaching the teens over many areas during the afternoon hours through the weekend. An unseasonably deep trough to our north will generate stronger onshore flow early next week. Expect conditions to turn breezy each afternoon, especially across Central California and in the desert interface regions of Southern California. Some gusts over 40 mph may occur by Monday afternoon. Temperatures will turn cooler next Sunday and Monday with the marine layer possibly protruding into the valleys during the night and morning hours. Warmer and less windy weather may return the weekend of the 19th.

Cal OES LAW ENFORCEMENT MISSIONS

Ongoing Cal OES Law Missions

- **2017-LAW-37928, 08/08/17**, At approximately 1600 hours, Cal OES Law Duty Officer (LDO) made contact with the California Air National Guard on behalf of the Fresno County Sheriff's Office. The contact regarded a recovery mission which has been on-going for approximately one week. Two Individuals were involved in a fatal vehicle accident on HWY 180 approximately 500' into a river gorge on the Upper Kings River. The rugged terrain and high waters are hindering recovery efforts and therefore consultation from the National Guard was being sought for potential assistance. The National Guard and their subject matter experts will be meeting in Fresno and then performing a reconnaissance flight to the site for evaluation. **UPDATE: 8/09/17, 2100 hours**, The National Guard reported that they were unable to satisfactorily evaluate the recovery mission with the Blackhawk Helicopter they arrived in and will re-engage on 08/10/17 with a Chinook Helicopter. The consultation efforts will be continued. **Mission Ongoing.**

Cal OES MISSION TASKING
